Project Part 2: Creation of the Service level and the Web view level

Work to do:

1. Follow Tutorial 2 "Creation of a CRUD J2EE Web application using Spring MVC and Hibernate" steps in order to respect the same project structure to create your service level and web view level
2. In respect to this tutorial, your service level should be developed to interact with the DAO level in order to respond queries from the web view
3. In respect to this tutorial, the web view should be a set of JSP files. Each JSP file is binded to a controller.
